HVCA

Established in 1980, Parker Bromley has worked hard to earn an enviable reputation for completing contracts on time and within budget for both private and commercial clients.

Parker Bromley's key strengths are reflected in their core values, which is one of open communication, whilst always respecting absolute client confidentiality.

"Parker Bromley are able to design and install clean, renewable, sustainable energy and energy saving measures in a responsible and efficient single package"

By integrating building services and new eco friendly technologies Parker Bromley are able to share knowledge and implement best practice, making installation simpler, more efficient, and economical.

REGISTERED MEMBER

With the housing market rapidly changing toward new technologies some companies are only just waking up to the idea of reposition themselves to embrace and deliver these green measures.

However, Parker Bromley's own evolution started over 10 years ago, which left the company uniquely positioned to play a strategic role to support the client. This is achieved whilst health & safety and environmental control remain of paramount importance.

To ensure we are always ahead of the field and respond to client and market requirements, we have introduced supply chain alignment procedures linked to Key Performance Indicators to drive continuous improvement throughout the business.

"Parker Bromley's vision is to set the standard upon which others are measured"

natural insulation

biofa paints & products

In addition to this our company's organisation and operations are independently certified to BS EN ISO 9001:2000 & BS EN ISO 14001:2004 (Environmental Management Services).

Parker Bromley are an Equal Opportunities Employer and place the Health & Safety and well-being of those who work for us as the company's highest importance.

This has been borne out by Parker Bromley being awarded four consecutive Gold Medal Awards by RoSPA – The Royal Society of Prevention of Accidents.

Why not speak with one of our experienced and dedicated professionals today and experience why Parker Bromley is making a difference in the way environmental housing contracts are being awarded.
